Class name: Science Topics Thur. Instructor: Mr. Joseph Drakos

Hello, and welcome to the Tsukuba Center for the Institutes! My name is Joe Drakos and I have been working at the institute for a number of years helping eager people to improve their English skills. I hope that our time together will be profitable for you and I look forward to learning a thing or two from you about science.

As you probably already know, science is a broad topic consisting of many facets. The goal of this course on my part is to provide information through listening activities about the various fields of science, lectures about science and pseudoscience by the teacher or current science news. As for the participants, I would like you to introduce some of the science related activities you are involved in. Every class will include discussion about the lesson's theme.

I am sure that you are eager to join in the class, but I must emphasize the importance of participation.

I look forward to meeting you!

Class of 2019 : Science Topics 木

Instructor: Mr. Joseph Dracos
