

Class name: 中級月 Intermediate Mon. -Communicating Your Ideas (online /18:30-20:00)

Instructor: Ms. Claire Summers

This is a new class aimed at those who would like to use their English to discuss important world issues and ideas. We will cover topics such as conservation, innovation, music, education, urban planning and psychology. Even though the topics may sound difficult we will be using a textbook which is appropriate for intermediate level students. This means there will be extra help with new vocabulary and plenty of opportunities to practise new skills.

The emphasis will be on improving your listening and speaking skills by regularly watching and discussing short TED talks. TED presenters are passionate about their topics and effective in the way they communicate. So, by studying these talks and employing the same techniques, you will also be able to use successful strategies for communicating your ideas.

My hope is that, through this class, you will enjoy using English to learn about some unusual topics in a friendly and relaxed environment. Looking forward to seeing you in class!
